

# SMARTFish®

***Congratulations, and thank you for purchasing a SmartFish® from Kamooki.***

Get ready to fish like you have never fished before!

**SmartFish®** is engineered with patented technology to deliver the most versatile presentation with every cast. The power is in your hands to **SmartFish®** YOUR way.

## **1) Crank your SmartFish®**

across the top of vegetation or along weed lines and watch its uniquely erratic rattling and vibrating actions trigger the intrinsic predatory response of game fish. This technique is particularly effective for Largemouth Bass and Northern Pike.

## **2) Crawl, walk or run your SmartFish®**

across bottom structure and start catching the fish you've been missing! Our patented **SmartFish®** technology enables you to work even the most unforgiving underwater terrain as fast or as slowly as you want. This technique is irresistible to Smallmouth Bass, Lake Trout and Walleye.

## **3) Vertical jig your SmartFish®**

in open or hard water seasons throughout the column of water. When pumped, your **SmartFish®** will swim in a circular pattern, rattling and vibrating to telegraph its location through the water. This technique is especially alluring to Lake Trout and Walleye.

**KAMOOKI.**
